Counsel to: **The Coalition of American Manufacturers of Mobile Access Equipment**

RE: EAPA CASE 8133 – Notice of Initiation of Investigation and Interim Measures

To the Counsel and Representatives of the above-referenced entities:

This letter is to inform you that U.S. Customs and Border Protection (CBP) has commenced a formal investigation under Title IV, Section 421 of the Trade Facilitation and Trade Enforcement Act of 2015, commonly referred to as the Enforce and Protect Act (EAPA), for U.S. importer XCMG North America Corporation (XCMG US) or (the Importer). CBP is investigating whether XCMG US is evading antidumping duty (AD) A-570-139 and countervailing duty (CVD) order C-570-140 on certain mobile access equipment and subassemblies thereof (MAE) or (covered merchandise) from the People's Republic of China (China).¹ CBP imposed interim measures because there is reasonable suspicion that the Importer evaded the *Orders* by entering Chinese MAE into the United States without paying applicable duties while declaring to CBP that the MAE in these entries were Mexican-origin and not covered by the *Orders*.²

¹ See *Certain Mobile Access Equipment and Subassemblies Thereof from the People's Republic of China*, 87 Fed. Reg. 22190 (U.S. Department of Commerce, April 14, 2022) (*AD Order*) and *Certain Mobile Access Equipment and Subassemblies Thereof from the People's Republic of China: Countervailing Duty Order and Amended Final Affirmative Countervailing Duty Determination*, 86 Fed. Reg. 70439 (U.S. Department of Commerce, December 10, 2021) (*CVD Order*). We refer to the *AD Order* and the *CVD Order* collectively as "the *Orders*."

² See 19 U.S.C. § 1517(e); see also 19 C.F.R. § 165.24.

Period of Investigation

On October 22, 2024, the Coalition of American Manufacturers of Mobile Access Equipment (“the Coalition” or “the Alleger”)³ filed EAPA allegation 8133 claiming that XCMG US is evading the *Orders*. CBP acknowledged receipt of the properly filed allegation on June 17, 2025.⁴ Pursuant to 19 C.F.R. § 165.2, entries covered by an EAPA investigation are those “entries of allegedly covered merchandise made within one year before the receipt of an allegation....” Entry is defined as an “entry for consumption, or withdrawal from warehouse for consumption, of merchandise in the customs territory of the United States....”⁵ As such, the entries covered by this investigation would be those entered for consumption, or withdrawn from warehouse for consumption, from June 17, 2024, through the pendency of this investigation.⁶ However, 19 C.F.R. § 165.2 also states that “at its discretion, CBP may also investigate other entries of covered merchandise” outside of the period one year prior to receipt of an allegation until the pendency of the investigation.⁷ Accordingly, CBP will investigate entries imported from February 1, 2024 through the pendency of the investigation, and this will be the period of investigation (POI).

Initiation

On July 10, 2025, the Trade Remedy Law Enforcement Directorate (TRLED) within CBP’s Office of Trade, initiated EAPA investigation 8133 in response to The Coalition’s allegation which reasonably suggests that XCMG US evaded the *Orders* by means of transshipment through Mexico.⁸ A more detailed description of the alleged evasion scheme and evidence the Coalition provided follows.

Description of the Alleged Transshipment Scheme

In the Allegation, the Coalition alleged that XCMG US is importing MAE assembled in Mexico using Chinese subassemblies covered by the scope of the *Orders*. To support this contention, the

³ See The Coalition’s Letter, “Re: Certain Mobile Access Equipment and Subassemblies Thereof from the People’s Republic of China: Request for an Investigation under the Enforce and Protect Act,” dated October 22, 2024 (Allegation). The Alleger demonstrates that it qualifies as an interested party because the Coalition consists of JLG Industries, Inc. and Terex Corporation, who as members of the Coalition, filed the petitions before the Department of Commerce and U.S. International Trade Commission (USITC) for antidumping (AD) and countervailing duty (CVD) investigations of mobile access equipment from China. The Alleger also provided an excerpt from the USITC preliminary report that identifies both companies as U.S. producers of domestic like product at Attachment 3 of the Allegation. Thus, the Alleger is a coalition of domestic producers of domestic like product and therefore, pursuant to 19 C.F.R. § 165.1(4), the Alleger meets the definition of an interested party that is permitted to submit an EAPA allegation. See also The Coalition’s Letter, “Re: Certain Mobile Access Equipment and Subassemblies Thereof from the People’s Republic of China: Supplement to Request for an Investigation under the Enforce and Protect Act,” dated January 14, 2025 (Allegation Supplement) and The Coalition’s Letter, “Re: Certain Mobile Access Equipment and Subassemblies Thereof from the People’s Republic of China: Resubmission of Supplement to Request for an Investigation under the Enforce and Protect Act,” dated May 20, 2025 (2nd Supplement).

⁴ See TRLED’s email, “Official Receipt of EAPA 8133,” dated June 17, 2025.

⁵ See 19 C.F.R. § 165.1.

⁶ See 19 C.F.R. § 165.2.

⁷ *Id.*

⁸ See CBP Memorandum, “Initiation of Investigation for EAPA Case Number 8133,” dated July 10, 2025 (Initiation Memo).

Allegation provided a company profile for the Importer showing that it is the U.S. affiliate of XCMG China.⁹ The Allegation also points out that the plain scope language of the scope of the *Orders* clearly states that that assembling MAE in Mexico from Chinese sub-assemblies would not remove the finished MAE from the scope of the *Orders* because the scopes states that “{t}he scope of this order covers mobile access equipment *whether finished or unfinished, whether assembled or unassembled*, and whether the equipment contains any additional features that provide for functions beyond the primary lifting function {emphasis added}.” Furthermore, the scope of the *Orders* also states that:

*Processing of finished and unfinished mobile access equipment and subassemblies such as trimming, cutting, grinding, notching, punching, slitting, drilling, welding, joining, bolting, bending, beveling, riveting, minor fabrication, galvanizing, painting, coating, finishing, assembly, or any other processing either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. Inclusion of other components not identified as comprising the finished or unfinished mobile access equipment does not remove the product from the scope {emphasis added}.*¹⁰

The Allegation supports the contention that production at XCMG Mexico consists only of assembling Chinese MAE subassemblies by providing a report from a market research firm that [RESEARCH ACTIVITY] the XCMG facility in Monterrey, Mexico. As part of their research, the investigators interviewed [INDIVIDUALS INTERVIEWED], who stated that the plant only finishes sub-assemblies. Specifically, [DESCRIPTION OF INFORMATION OBTAINED FROM INTERVIEWEES]

[INFORMATION OBTAINED FROM INTERVIEW WITH INTERVIEWEES]. The [INFORMATION OBTAINED FROM INTERVIEW WITH INTERVIEWEES].”¹¹ During their research, the investigators also found a Facebook post from a factory worker showing a worker welding a sub-assembled extended lift. The video this worker posted does not contain any complete MAE assembly lines, which according to the Allegation, indicates that welding of sub-assemblies is the only work performed in XCMG US’s Mexican facility.¹²

The Allegation also shows that the Importer received shipments of assembled MAE from Mexico and likely declared these imports as Mexican origin. Specifically, the 2nd Supplement provides trade data showing that XCMG US acted as [DESCRIPTION OF ROLE OF THE IMPORTER IN IMPORT SHIPMENT DOCUMENTS].¹³ The Alleger also provided screenshots of websites showing that XG2632AC and XG1930AC are specific XCMG China product codes for two models of its scissor lifts.¹⁴

According to the Allegation, “{r}easonably available evidence implicates the company Grupo American Industries S.A. de C.V.” (GAIM) because workers at XCMG’s facility in Mexico are [

⁹ See Allegation at 7 and Exhibit 15.

¹⁰ See *AD Order* at 2193 and the *CVD Order* at 70442. The scope language is also quoted in the Allegation at 3-4.

¹¹ See Allegation at Exhibit 20.

¹² *Id.* at Exhibit 20.

¹³ See 2nd Supplement at Attachment 1.

¹⁴ See Allegation Supplement at Attachment 1.

DESCRIPTION OF EMPLOYEMENT ARRANGEMENTS].¹⁵ The Allegation Supplement and 2nd Supplement also provided trade data showing that GAIM was the shipper of shipments of MAE from Mexico to XCMG US.¹⁶ According to the Allegation, GAIM provides “shelter administrative services” to facilitate foreign companies’ operations in Mexico by outsourcing operations such as “[TASKS AND SERVICES PROVIDED BY GAIM].”¹⁷

Initiation Assessment

TRLED will initiate an investigation if it determines that “{t}he information provided in the allegation... reasonably suggests that the covered merchandise has been entered for consumption into the customs territory of the United States through evasion....”¹⁸ Evasion is defined as “the entry of covered merchandise into the customs territory of the United States for consumption by means of any document or electronically transmitted data or information, written or oral statement, or act that is material and false, or any omission that is material, and that results in any cash deposit or other security or any amount of applicable antidumping or countervailing duties being reduced or not being applied with respect to the covered merchandise.”¹⁹ Thus, an allegation must reasonably suggest not only that an importer alleged to be evading entered merchandise covered by an AD and/or CVD order into the United States, but also that such entry was made by a material false statement or act, or material omission, that resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.

In assessing the Allegation, CBP found that the information in the Allegation reasonably suggested that XCMG US imported MAE covered by the *Orders* by means of evasion. Specifically, [

INFORMATION ABOUT THE OPERATIONS OF THE MEXICN FACILITY
] and that “[INFORMATION ABOUT THE MEXICAN FACILITY].”²⁰

Research Conducted by CBP

Information from CBP Systems

CBP confirmed XCMG US’s name and address from public sources and in its internal systems.²¹ CBP further found that XCMG US declared entries of MAE as Mexican origin on CBP entry forms (7501s) filed since the beginning the of the POI as [DESCRIPTION], and therefore, the Importer did not pay AD duties on those entries.²² XCMG US declared [COMPANY NAME] as the manufacturer of these entries.²³

CBP Form 28s

On July 29, 2025, CBP sent a CBP Form 28 (CF-28) request for information to the Importer requesting information for entries [**NUMBER**]0867, [**NUMBER**]0727, [**NUMBER**]1346, and [**NUMBER**]9307. CBP requested a description of the merchandise and the production process, the name and address of the manufacturer, and labeled photographs of the factory where the goods in these entries were produced including photographs of production equipment. CBP also requested employee timecards for production workers involved in production of these entries, raw material purchase documents (e.g., raw material purchase orders (PO), raw material invoices, or raw materials BOLs), raw material consumption documents, and the name and address of the seller, if different from the manufacturer.²⁴ CBP asked the Importer if it is related to the seller of the merchandise and if so, how the relationship affects the price XCMG US paid for the merchandise in the entries listed on the CF-28.²⁵

The importer submitted its CF-28 response on August 28, 2025.²⁶ In its response, XCMG US provided most of the documents CBP requested, including photographs of the interior and exterior of the factory where the entries were made,²⁷ employee timecards,²⁸ invoices, BOLs and POs for some purchased inputs,²⁹ raw material requisition records from [**DATE RANGE**],³⁰ a production schedule for the months of [**DATE RANGE**],³¹ and documents it claimed were production records.³² However, the documents labeled as production records are in fact, quality control (QC) records that document the examination of finished products, not production of the covered merchandise.³³ XCMG US also provided instruction manuals for its products, which CBP did not request in the CF-28.³⁴

According to its CF-28 response, the Importer imported scissor lifts with the model numbers [**MODEL NUMBERS**] into the U.S. from XCMG Mexico for the four entries in question.³⁵ The Importer also provided export documents including invoices and exit passes, stating that it exported these model numbers to the U.S.³⁶ These are [**DESCRIPTION OF THE MODEL NUMBERS**], which as pointed out in the Allegation, are covered merchandise if produced in China or assembled in a third country (i.e., Mexico) using Chinese subassemblies.³⁷

²⁴ See CBP Form 28 for entry numbers 0867/0727/1346/9307, dated July 29, 2025 (CF-28).

²⁶ See XCMG US' letter, "Re: XCMG North America Corporation, Importer No. 81-101761700 Response to Request for Information Related to Entries No. [**#**]0867, [**#**]0727, [**#**]1346, and [**#**]9307," dated August 28, 2025 (CF-28 Response) at 3-4.

²⁷ *Id.* at Exhibit 9.

²⁸ *Id.* at Exhibit 10.

²⁹ *Id.* at Exhibit 12.

³⁰ *Id.* at 24 Exhibit 14.

³¹ *Id.* at Exhibit 13.

³² *Id.* at 24 and Exhibit 15.

³³ *Id.* at Exhibit 15.

³⁴ *Id.* at Exhibit 3.

³⁵ *Id.* at 2.

³⁶ *Id.* at Exhibit 2.

³⁷ See Allegation 2nd Supplement at Exhibit 1, and Attachment 1.

The Importer stated that “{t}he XCMG Mexico Plant {sic.} engages in substantial production activities. The imported products consist of thousands of individual parts, none of which are pre-assembled in China into major subassemblies such as scissor arm subassemblies, battery and hydraulic trays, chassis subassemblies, and battery and hydraulic trays.”³⁸ In the narrative of its response, XCMG US also provided a detailed description of the production process which stated that it produces its scissor lifts using [POTENTIAL INPUT] as the main input to produce the scissor arms.³⁹ The Importer also claimed that its Mexican supplier produces the chassis itself before connecting them to the scissor arms.⁴⁰

However, the supporting documents XCMG provided do not substantiate its contention that XCMG Mexico produced the MAE for entries 0867, 0727, 1346, and 9307 in Mexico without using Chinese subassemblies as inputs. Although the Importer provided production manuals describing the production process,⁴¹ the manuals describing [PROCESS],⁴² [PROCESS],⁴³ and [PROCESS],⁴⁴ have the name [COMPANY NAME] printed on the top of each page, rather than the name of XCMG US, the owner of the factory, or GAIM, the actual producer and seller. Only the manuals for painting appear to be from XCMG Mexico because they are labeled “[LABEL DESCRIPTION]” at the top of each page.⁴⁵ Furthermore, the Importer provided no manuals for the [PRODUCTION PROCESS].⁴⁶ Additionally, none of the photographs of the interior of XCMG Mexico’s factory show any production of subassemblies on site, but instead only show [GOODS SHOWN IN PHOTOGRAPHS] ready for integration with the rest of the covered merchandise.⁴⁷

XCMG provided invoices and POs for purchases of inputs sourced from the U.S. and Mexico,⁴⁸ and POs, invoices, and BOLs for inputs purchased from China.⁴⁹ However, the POs for Mexican and US-origin inputs list only [MERCHANDISE].⁵⁰ This indicates that GAIM and the XCMG US Mexico plant likely sources the vast majority of the inputs, including all the components of the [TYPES OF MERCHANDISE], from China. The sales contracts, invoices and BOLs provided in the CF-28 response only describe the inputs GAIM sourced from China as “[DESCRIPTION]” with no more detailed description.⁵¹ [GOODS DESCRIPTION] are generally used as replacements for broken or damaged equipment and are not usually used as inputs for new equipment. Furthermore, [DESCRIPTION OF GOODS] could be subassemblies

covered by the scope of the *Orders*, or smaller components not covered by the scope. Because the documents the Importer provided do not describe the inputs imported from China in any greater detail, these documents do not detract from the evidence in the Allegation that GAIM imports subassemblies that would qualify as covered merchandise. At the very least, the only clear information that the raw material purchase documents provide is that the vast majority of inputs GAIM uses to produce MAE in Mexico are Chinese origin, which supports reasonable suspicion of evasion.

The raw material requisition records the Importer provided cannot be connected to the entries in question for several reasons. First, the requisition records are all dated the first of each month or the last three days, with no evidence of raw materials withdrawn from inventory during the rest of those months.⁵² This suggests that records are missing, unless production only occurred on the first of each month, or the last three days. Furthermore, the requisition records are all dated [TIME RANGE]⁵³ but XCMG US imported the entries covered in the CF-28 in [TIME RANGE],⁵⁴ more than one year after the dates on the warehouse requisition records. This long-time lag suggests that the records XCMG US provided are not the production records for the entries CBP asked for in the CF-28. These records only identify the raw materials by product code with no descriptions of the raw materials being used. Therefore, the raw material requisition documents the Importer provided do not contradict the evidence in the Allegation that GAIM likely used subassemblies from China as inputs to produce the MAE it sold the Importer.

Like the raw material requisition record, the QC records XCMG US provided in Exhibit 15 of its CF-28 response also cannot be connected to the entries in question because the QC records are dated about one year before the entries were imported.⁵⁵ This suggests that the merchandise inspected was not the merchandise in the entries CBP asked about in the CF-28. Furthermore, these records only demonstrate that XCMG's Mexico facility examined finished products for QC, but do not demonstrate production in Mexico because XCMG provided QC records instead of actual production records.⁵⁶

In response to CBP's question about the relationship between GAIM and the Importer, XCMG US stated that it is not related to GAIM, but also stated that GAIM's operations in Monterrey, Mexico, are the same as the "XCMG Mexico Plant." However, the Importer provided CBP with no explanation of exactly what services GAIM provides or what steps of the production process, if any, GAIM carries out at the facility where these entries were made. The importer did not explain whether the building or any equipment inside are owned by XCMG US or by GAIM. Instead, XCMG US stated that there is a "Shelter Services Agreement" between the Importer and GAIM and that "{t}he products subject to Entries under Review were manufactured pursuant to the Shelter Services Agreement {sic.}"⁵⁷ Thus, the Importer did not fully explain its relationship with GAIM and provided no response to the part of that question asking how the relationship between the Importer and the seller (GAIM) affects the price paid for the merchandise.

⁵⁷ *Id.* at 1.

Interim Measures

Not later than 90 calendar days after initiating an investigation under EAPA, CBP will decide, based on the record of the investigation, if there is reasonable suspicion that merchandise covered by AD/CVD orders was entered into the United States through evasion. CBP need only have sufficient evidence to support a reasonable suspicion that the importer alleged to be evading entered merchandise covered by an AD and/or CVD order into the customs territory of the United States by a materially false statement or act, or material omission, that resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.⁵⁸ If reasonable suspicion exists, CBP will impose interim measures pursuant to 19 U.S.C. § 1517(e) and 19 C.F.R. § 165.24. As explained below, CBP is imposing interim measures because the evidence establishes reasonable suspicion that XCMG US entered Chinese-origin MAE into the United States through evasion.⁵⁹

Analysis

As noted above, information in the Allegation indicates that the purported manufacturer, GAIM, likely performs only assembly operations at XCMG US's Mexican factory. The evidence of this includes:

- Trade data provided in the Allegation showing that XCMG US imports scissor lifts from Mexico to the United States.⁶⁰ This is supported by the Importer's acknowledgement in its CF-28 responses that the MAE it imported from Mexico under entry numbers -0867, -0727, -1346, and -9307 consists of scissor lifts which, if made in China, or assembled in a third country from Chinese subassemblies, would be covered by the scope of the *Orders*.⁶¹
- Interviews with [INTERVIEWEES] who told an investigator hired by the Allegor that "machines arrive roughly [DESCRIPTION OF PRODUCTION PROCESS]."⁶²
- Evidence from the CF-28 response that the vast majority of inputs GAIM uses to produce MAE are Chinese-origin.⁶³

Although the Importer asserted that production in Mexico would remove the merchandise it imports from the scope of the *Orders*, XCMG US did not provide adequate support for this contention because:

- The input purchase documents provided in the CF-28 Response describe all the inputs GAIM sourced from China as "[GOODS DESCRIPTION]".⁶⁴

⁵⁸ See 19 U.S.C. § 1517(e) and 19 C.F.R. § 165.24.

⁵⁹ See 19 C.F.R. § 165.24(a).

⁶⁰ See Allegation Supplement at Attachment 5 and 2nd Supplement at Attachment 1.

⁶¹ See CF-28 Response at 2, Exhibit 2, and Exhibit 4.

⁶² See Allegation at Exhibit 20.

⁶³ See CF-28 Response at Exhibits 11 and 12.

⁶⁴ *Id.* at Exhibit 11.

- The material requisition documents, and QC documents provided in the CF-28 Response are dated more than a year before XCMG US imported the entries in question.
- None of the photographs of the interior of XCMG Mexico's factory show any production of subassemblies on site, but instead only show [GOODS DESCRIPTION] ready for integration with the rest of the covered merchandise.

Enactment of Interim Measures

Based on the record evidence described above, CBP finds that reasonable suspicion exists that the Importer entered covered merchandise through evasion into the United States by importing Chinese-origin MAE subassemblies assembled in Mexico while falsely declaring Mexico as the country of origin.

Therefore, CBP is imposing interim measures pursuant to this investigation.⁶⁵ Specifically, in accordance with 19 U.S.C. § 1517(e)(1)-(3), CBP shall:

- (1) suspend the liquidation of each unliquidated entry of such covered merchandise that entered on or after July 10, 2025, the date of the initiation of the investigation;
- (2) pursuant to the Commissioner's authority under 19 U.S.C. § 1504(b), extend the period for liquidating each unliquidated entry of such covered merchandise that entered before, July 10, 2025, the date of the initiation of the investigation; and
- (3) pursuant to the Commissioner's authority under 19 U.S.C. § 1623, take such additional measures as the Commissioner determines necessary to protect the revenue of the United States, including requiring a single transaction bond or additional security or the posting of a cash deposit with respect to such covered merchandise.⁶⁶

Any future submissions or factual information that you submit to CBP pursuant to this EAPA investigation must be made electronically using EAPA's case management system (CMS) at <https://eapallegations.cbp.gov/>. Please provide a business confidential and public version to CBP *via* the CMS to serve the parties to this investigation (*i.e.*, to the parties identified at the top of this notice). Administrative record documents will be available *via* CMS; to learn more about the Administrative Protective Order (APO) process for EAPA investigations, including eligibility requirements, please see the APO Handbook, found at <https://www.cbp.gov/document/user-documentation/administrative-protective-order-apo-handbook>.⁶⁷ Please note that CBP is requiring that all documents submitted *via* the CMS are made text searchable, especially if those documents are submitted as PDFs.

⁶⁵ See 19 U.S.C. § 1517(e); *see also* 19 C.F.R. § 165.24(a).

⁶⁶ See *also* 19 C.F.R. § 165.24(b)(1)(i-iii).

⁶⁷ See 19 C.F.R. § 165.4. *See also* 19 C.F.R. § 165.23(c) and 19 C.F.R. § 165.26. You will need a login name and password to use the CMS. The website will direct you how to obtain those.
