RE: Notice of Initiation of Investigation and Interim Measures - EAPA Consolidated Case 8250

Dear Counsel and/or Representatives for the Above-Referenced Entities:

This letter is to inform you that U.S. Customs and Border Protection (CBP) has commenced a formal investigation of California Plumbing Supplies LLC (California Plumbing), The Long Mile, Inc. (Long Mile), and Seamist Pomona Group, LLC (Seamist Pomona) (collectively, the Importers) under Title IV, Section 421 of the Trade Facilitation and Trade Enforcement Act of 2015, commonly referred to as the Enforce and Protect Act (EAPA).¹ CBP is investigating

¹ As discussed below in the “Doing Business as” Companies” subsection of this notice, California Plumbing and Seamist Pomona appear to be “doing business as” companies for Wells Plumbing and Heating Supplies, Inc. (Wells Plumbing), given that California Plumbing and Seamist Pomona operate from locations associated with Wells

whether the Importers evaded antidumping duty (AD) and countervailing duty (CVD) orders A-570-079 and C-570-080, respectively, on cast iron soil pipe (CISP) from the People's Republic of China (China)² and AD and CVD orders A-570-062 and C-570-063, respectively, on cast iron soil pipe fittings (CISPF) from China.³ CBP has imposed interim measures based on reasonable suspicion that the Importers have entered merchandise covered by the *CISP Orders* and *CISPF Orders* into the customs territory of the United States through evasion.⁴

Period of Investigation

Pursuant to 19 C.F.R. § 165.2, entries covered by an EAPA investigation are “those entries of allegedly covered merchandise made within one year before the receipt of an allegation.” Entry is defined as an “entry, or withdrawal from warehouse for consumption, of merchandise into the customs territory of the United States.”⁵ CBP acknowledged receipt of the properly filed allegations against the Importers on December 22, 2025, and January 13, 2026, in accordance with 19 C.F.R. § 165.12(a).⁶ Therefore, the entries covered by the period of investigation (POI) are those entered for consumption, or withdrawn from warehouse for consumption, from December 22, 2024,⁷ through the pendency of this investigation.⁸

Initiation

The Trade Remedy Law Enforcement Directorate (TRLED) within CBP's Office of Trade will initiate an investigation if it determines that “{t}he information provided in the allegation ... reasonably suggests that the covered merchandise has been entered for consumption into the customs territory of the United States through evasion.”⁹ Evasion is defined as “entering covered merchandise into the customs territory of the United States by means of any document or electronically transmitted data or information, written or oral statement, or act that is material and false, or any omission that is material, and that results in any cash deposit or other security or any amount of applicable antidumping or countervailing duties being reduced or not being applied with respect to the merchandise.”¹⁰ Thus, the allegation must reasonably suggest not

Plumbing. Further, in the case of Seamist Pomona and Wells Plumbing, the same individual is the registered agent and a manager of both companies.

² See *Cast Iron Soil Pipe from the People's Republic of China: Antidumping Duty Order*, 84 Fed. Reg. 19,035 (May 3, 2019) and *Cast Iron Soil Pipe from the People's Republic of China: Countervailing Duty Order*, 84 Fed. Reg. 19,039 (May 3, 2019) (collectively, *CISP Orders*).

³ See *Cast Iron Soil Pipe Fittings from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order*, 83 Fed. Reg. 44,570 (August 31, 2018) and *Cast Iron Soil Pipe Fittings from the People's Republic of China: Countervailing Duty Order*, 83 Fed. Reg. 44,566 (August 31, 2018) (collectively, *CISPF Orders*).

⁵ See 19 U.S.C. § 1517(a)(4); see also 19 C.F.R. § 165.1.

⁶ See CBP Emails, “EAPA 8251 - Receipt of Allegation” (December 22, 2025); “EAPA 8254 - Receipt of Allegation” (December 22, 2025); “EAPA 8257 - Receipt of Allegation” (December 22, 2025); “EAPA 8260 - Receipt of Allegation” (December 22, 2025); and “EAPA 8250 - Receipt of Allegation” (January 13, 2026).

⁷ When CBP consolidates multiple allegations into a single investigation, as we have done here, the date on which CBP receives the first of such allegations will be used to calculate the period of investigation. See also “Consolidation of the Investigations” section, *infra*.

⁸ See 19 C.F.R. § 165.2.

⁹ See 19 C.F.R. § 165.15(b); see also 19 U.S.C. § 1517(b)(1).

¹⁰ See 19 U.S.C. § 1517(a)(5)(A); see also 19 C.F.R. § 165.1 (setting forth the definition of “evasion”).

only that merchandise subject to an AD and/or CVD order was entered into the United States by the importer through evasion, but also that such entry was made by a material false statement or act, or material omission, which resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.

On January 16, 2026, TRLED initiated an EAPA investigation against the Importers based on allegations filed by the Cast Iron Soil Pipe Institute (the Alleger).¹¹ In the allegations, the Alleger asserted that the Importers are evading the AD/CVD orders on CISP and CISPF from China by importing covered merchandise¹² that was transshipped through Cambodia into the customs territory of the United States.

Description of the Alleged Evasion Scheme and Supporting Evidence

The Alleger contends that the Importers are engaged in a continuation of the transshipment scheme addressed in prior EAPA investigations involving Linghong Li and her corporation Lino International Inc. (Lino), an importer of CISP and CISPF into the United States.¹³ In the first such set of EAPA investigations, which occurred in 2020-2021, Lino claimed to be importing CISP and CISPF manufactured in Cambodia by HiCreek Plumbing Co., Ltd. (HiCreek).¹⁴ The Alleger asserts that CBP found the following in those investigations:

- A Chinese company likely established HiCreek to avoid payment of AD/CVD duties on Chinese CISP and CISPF;¹⁵
- A site visit to HiCreek's facility revealed that its production equipment was unused and that it was labeling Chinese-origin CISPF as made in Cambodia;¹⁶
- Specific shipments of CISP could be traced from China to HiCreek and then to Lino in the United States;¹⁷
- Lino "was an active agent of transshipment" which made "misleading statements" about the merchandise to persuade other U.S. importers to engage in the scheme;¹⁸

¹¹ See CBP Memorandum, "Initiation of Investigation for EAPA Consolidated Case Number 8250" (January 16, 2026) (Initiation Memorandum); see also Letters from the Alleger, "Cast Iron Soil Pipe from China: Request for an Investigation under the Enforce and Protect Act – California Plumbing Supplies" (December 18, 2025); "Cast Iron Soil Pipe from China: Request for an Investigation under the Enforce and Protect Act – The Long Mile" (December 18, 2025); "Cast Iron Soil Pipe from China: Request for an Investigation under the Enforce and Protect Act – Seamist Pomona Group, LLC" (December 18, 2025); "Cast Iron Soil Pipe Fittings from China: Request for an Investigation under the Enforce and Protect Act – The Long Mile" (December 18, 2025); and "Cast Iron Soil Pipe Fittings from China: Request for an Investigation under the Enforce and Protect Act – Seamist Pomona Group, LLC" (December 18, 2025) (collectively, Allegations).

¹² The term "covered merchandise" refers to merchandise that is subject to an AD or CVD order. See 19 C.F.R. § 165.1.

¹³ See Allegations at 4.

¹⁸ *Id.* at 5 and Exhibit 3, page 15.

- Lino previously reported to the U.S. Department of Commerce that it owned CISP/CISPF production facilities in China;¹⁹
- Two Chinese affiliates, Dalian Metal I/E Co., Ltd. (Dalian Metal) and Dalian Lino F.T.Z. Co., Ltd., played “a coordinating role in obtaining Lino’s... orders and in exporting merchandise;”²⁰ and,
- While the investigations were still ongoing, Lino established a front company, DLNL Trading Inc. (DLNL), to continue importing CISP and CISPF from HiCreek, and thereby attempted to evade CBP’s interim measures.²¹

In 2021-2022, CBP conducted a second round of EAPA investigations involving Lino and determined that:

- Little Fireflies International Co. (Little Fireflies) began serving as the claimed exporter for shipments of CISP and CISPF from Cambodia and as the importer in some cases;²²
- A Lino employee at the Chinese entity Dalian Metal, Yuanshou (Ryan) Zhang, registered Little Fireflies in Cambodia;²³
- Shipments that had commenced as DLNL’s shipments were changed on documentation to appear as Little Fireflies’ shipments, and Lino had changed the documentation without informing its customers that they were buying from Little Fireflies;²⁴
- Little Fireflies had been listed falsely as the producer of the goods in Cambodia;²⁵
- Lino subsequently began using another name, Phoenix Metal Co., Ltd. (Phoenix Metal), as the exporter for shipments of CISP from Cambodia and as the U.S. importer, even amending documentation mid-shipment; after that, it started using Camellia Casting as the importer of record and Guang Dong Xiong Sheng Hardware Stainless Steel Building Materials (Cambodia) Co., Ltd. as the declared exporter/manufacturer;²⁶
- Although Phoenix Metal asserted that it had purchased HiCreek’s machinery and taken over as the producer in Cambodia, the evidence on the record contradicted these claims, and Phoenix Metal’s attempt to demonstrate its production capability at its facility during verification revealed that the production process was set up just to mislead CBP and did not constitute real, ongoing production;²⁷ and,
- There were many discrepancies in Lino’s claims, including missing and incorrect records and continued attempts by Lino to hinder CBP’s investigation.²⁸

The Alleger states that Lino continues to transship Chinese-origin CISP and CISPF through Cambodia using a new set of corporate fronts.²⁹ Starting in October 2023 and continuing through October 2024, Lino, under the name Lino Metal Corp., started entering shipments of CISP and CISPF from PBCC Engineering Co., Ltd. (PBCC Engineering) in Cambodia.³⁰ The Alleger states that Lino appears to have entered more than 388 tons of CISP and CISPF supposedly manufactured by PBCC Engineering.³¹ However, the Alleger asserts that PBCC Engineering's Cambodian corporate registration and Facebook page show it is not a manufacturing company, but a construction company in Cambodia.³² The Alleger avers there is no obvious link between PBCC Engineering and Lino, so it is unclear whether PBCC Engineering even knows that its name has been used in this way.³³

In November 2024, the Alleger maintains, Lino shifted its shipments of CISP and CISPF from PBCC Engineering to a new importer name, Long Mile.³⁴ In September 2024, a Joseph Gweun registered Long Mile in Diamond Bar, California at a residential address.³⁵ The Alleger asserts that one shipment under Long Mile's name lists Lino as the notify party, and that Long Mile and Lino use the same purchase order numbering system.³⁶ The Alleger claims that almost 758 tons of CISP and CISPF from Cambodia have been entered under Long Mile's name to mask Lino's involvement.³⁷

According to the Allegations, in July 2025, another name, Seamist Pomona, began to appear as the importer of shipments of CISP and CISPF from PBCC Engineering.³⁸ The Alleger asserts that Honghai Wang, the president of Wells Plumbing and Heating Supplies, Inc. (Wells Plumbing), registered Seamist Pomona in Houston, Texas in April 2025, using the same address at which he had registered Wells Plumbing in the state of Texas.³⁹ Wells Plumbing is a large plumbing distributor headquartered in Chicago with locations in Illinois, Tennessee, Florida, Texas, and California.⁴⁰ The Alleger states that Seamist Pomona is merely a corporate front for Wells Plumbing, and that Seamist Pomona was established to serve as the importer of transshipped Chinese-origin CISP and CISPF from Lino.⁴¹ The Alleger maintains that Seamist Pomona has entered more than 188 tons of CISP and CISPF from Cambodia from PBCC Engineering and Phoenix Metal, with shipments from both entities displaying the same purchase order and invoice numbering systems.⁴²

⁴¹ *Id.* at 11.

⁴² *Id.* at 11 and Exhibit 14.

Lastly, the Alleger states that in August 2025, yet another company, California Plumbing, started to appear as the importer of shipments of CISP from Cambodia.⁴³ The Alleger avers that Linghong Li, the owner of Lino, registered California Plumbing in July 2025, indicating that California Plumbing is affiliated with other Lino entities.⁴⁴ California Plumbing is registered at 1711 California Ave. in Monrovia, CA, which is the address that Wells Plumbing uses sometimes for its Monrovia, CA branch, and is located on the back of Wells Plumbing's Monrovia, CA lot.⁴⁵ According to the Alleger, Linghong Li's registration of California Plumbing demonstrates that Lino and Wells Plumbing are working together in the evasion scheme and that California Plumbing is just another front for Wells Plumbing.⁴⁶ The Alleger states that the shipments to California Plumbing were exported from Cambodia by an entity named O.B Trading Co., Ltd. (O.B Trading).⁴⁷ The Alleger asserts that O.B Trading appears to be another false name used by Lino, as O.B Trading is registered in Cambodia as a "Beauty, cosmetic & personal care" company, not a manufacturing company, and thus cannot be the source of the CISP in Cambodia.⁴⁸ The Alleger points out that the shipments from O.B Trading display the same purchase order numbering system as the other shipments that tie to Lino.⁴⁹

Initiation Assessment

TRLED considered the evidence submitted by the Alleger to determine whether it should initiate an EAPA investigation. In assessing the facts provided in the Allegations, CBP found the information submitted by the Alleger reasonably suggested that the Importers entered merchandise covered by the AD/CVD orders on CISP and CISPF from China into the customs territory of the United States through evasion. The Alleger provided information detailing the Importers' connections to entities that were subject to prior EAPA investigations involving Chinese-origin CISP and CISPF from China, thereby showing a pattern of continued evasion.⁵⁰ These entities include Lino, for which CBP had previously determined there was substantial evidence of evasion of the AD/CVD orders on CISP and CISPF from China in EAPA consolidated case 7454 and EAPA case 7455, respectively, and Phoenix Metal, for which CBP had also found there was substantial evidence of evasion of the AD/CVD orders on CISP from China in EAPA consolidated case 7621.⁵¹ Shipment data show that from October 2023, through October 2024, a Cambodian company, PBCC Engineering, shipped CISP and CISPF to Lino in the United States.⁵² However, according to its Cambodian registration and Facebook page, PBCC Engineering is a construction company, and thus, does not appear to be a CISP and/or CISPF producer or relate to the CISP/CISPF industry.⁵³ More recently, in November 2024, PBCC Engineering began shipping CISP and CISPF from Cambodia to Long Mile in the United

States instead of to Lino.⁵⁴ Shipments from PBCC Engineering to Long Mile continued through July 2025 before switching to a new entity, Seamist Pomona, that same month.⁵⁵ The shipment data show that Phoenix Metal also shipped CISP and CISPF from Cambodia to Seamist Pomona.⁵⁶ Finally, starting in August 2025, shipments of CISP from Cambodia were directed to California Plumbing, whose registration by Linghong Li indicates that it is affiliated with other Lino entities.⁵⁷ The shipments to California Plumbing were exported from Cambodia by O.B Trading, which is registered in Cambodia as a “Beauty, cosmetic & personal care” company, and therefore, does not appear to be a CISP producer or be related to the CISP industry.⁵⁸ Additionally, data provided in the allegations demonstrates that PBCC Engineering and Phoenix Metal use the same invoice numbering system for shipments of CISP and CISPF from Cambodia, and that Long Mile, Seamist, and California Plumbing all utilize the same purchase order numbering systems as Lino.⁵⁹ Further, information in the allegations demonstrates that both Seamist Pomona and California Plumbing are registered at addresses also used by Wells Plumbing, a large plumbing distributor, suggesting that Wells Plumbing is doing business as Seamist Pomona and California Plumbing, or, put another way, that Seamist Pomona and California Plumbing have been established as corporate fronts for Wells Plumbing.⁶⁰ The establishment of shell corporations or corporate fronts is an indication that an entity may be involved in an evasion scheme, as an evading entity may be using the front company in an attempt to hide its actions.

For the reasons set forth herein, CBP initiated an investigation on January 16, 2026, under the authority of 19 U.S.C. § 1517(b)(1) for the Importers for entries of covered merchandise that are alleged to be entered for consumption into the customs territory of the United States through evasion.⁶¹

Consolidation of the Investigations

CBP consolidated EAPA investigations 8250, 8251, 8254, 8257, and 8260 against the Importers into a single investigation at the time of initiation under EAPA Consolidated Case 8250, and CBP is maintaining a single administrative record.⁶² At its discretion, CBP may consolidate multiple allegations against one or more importers into a single investigation, pursuant to 19 C.F.R. § 165.13(b), which provides that the factors that CBP may consider in consolidating multiple allegations include, but are not limited to, whether the multiple allegations involve: 1) relationships between the importers; 2) similarity of covered merchandise; 3) similarity of

⁵⁹ *Id.* at 10-12 and Exhibits 9, 11, 14, and 18.

⁶⁰ *Id.* at 10-13 and Exhibits 15, 16, 19, and 21.

⁶¹ *See* Initiation Memorandum; *see also* 19 C.F.R. § 165.15.

⁶² *See* Initiation Memorandum at 7. The listed EAPA case numbers refer to the following allegations filed by the Allegor: 8250 – evasion by California Plumbing of the AD/CVD orders on CISP from China; 8251 – evasion by Long Mile of the AD/CVD orders on CISP from China; 8254 – evasion by Seamist Pomona of the AD/CVD orders on CISP from China; 8257 - evasion by Long Mile of the AD/CVD orders on CISPF from China; and 8260 – evasion by Seamist Pomona of the AD/CVD orders on CISPF from China.

AD/CVD orders; and 4) overlap in time periods of entries of covered merchandise.⁶³ In these investigations, all the Importers are alleged to be entering merchandise that is covered by the AD/CVD orders on CISP and/or CISPF from China, all of which encompass cast iron soil products.⁶⁴ Also, two of the Importers, Seamist Pomona and California Plumbing, appear to be corporate fronts for the same plumbing distributor, Wells Plumbing. In addition, the Importers' entries all fall within similar time periods.⁶⁵ Moreover, the Importers are alleged to import Chinese-origin CISP and CISPF that is transshipped through Cambodia to evade AD/CVD duties.⁶⁶ Because factors warranting consolidation are present in these investigations, CBP is consolidating them and will provide notice pursuant to 19 C.F.R. § 165.13(c). We note that the deadlines for this consolidated investigation will be set from the date of initiation of EAPA case 8250, which is January 16, 2026.

Interim Measures

Not later than 90 calendar days after initiating an investigation under EAPA, TRLED will decide whether the record of the investigation gives rise to reasonable suspicion that covered merchandise was entered into the customs territory of the United States through evasion.⁶⁷ CBP need only have sufficient evidence to support a reasonable suspicion that the importers alleged to be evading entered merchandise covered by an AD and/or CVD order into the United States by a material false statement or act, or material omission, that resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.⁶⁸ If reasonable suspicion exists, CBP will impose interim measures pursuant to 19 U.S.C. § 1517(e) and 19 C.F.R. § 165.24. As explained below, CBP is imposing interim measures because, based on the record evidence, there is reasonable suspicion that the Importers entered covered merchandise into the customs territory of the United States through evasion.

CF-28s and Cargo Exam

A. Long Mile

Prior to initiation of this EAPA investigation, CBP issued CBP Form 28 (CF-28) requests for information to Long Mile about an entry consisting of both CISP and CISPF that was made during the POI.⁶⁹ Specifically, on April 9, 2025, CBP issued a CF-28 to Long Mile for entry number [#]8058, requesting that the importer provide, among other information, the original entry package, bills of lading, mill test report, original purchase order, and proof of payment for the merchandise.⁷⁰ Long Mile submitted a response to this CF-28 on May 20,

⁶³ See also 19 U.S.C. § 1517(b)(5).

⁶⁴ See generally Allegations.

⁶⁵ *Id.*

⁶⁶ *Id.*

⁶⁷ See 19 U.S.C. § 1517(e); see also 19 C.F.R. § 165.24(a).

⁶⁸ *Id.*; see also 19 U.S.C. § 1517(a)(5)(A) and 19 C.F.R. § 165.1 (setting forth the definition of “evasion”).

⁶⁹ See CBP Post-Receipt Data Report for EAPA Case Number 8251 (January 9, 2026) (Post-Receipt Data for Long Mile, CISP) and CBP Post-Receipt Data Report for EAPA Case Number 8257 (January 9, 2026) (Post-Receipt Data for Long Mile, CISPF).

⁷⁰ See CF-28 issued to Long Mile for entry number [#]8058 (April 9, 2025).

2025.⁷¹ On July 9, 2025, CBP issued another CF-28 to Long Mile for the same entry, requesting additional information such as complete production records for both the CISP and CISPF, the electric bill for the month of production, production capabilities, original mill test reports, and again, proof of payment for this entry.⁷² Long Mile provided a response to the second CF-28 on September 8, 2025.⁷³ After reviewing Long Mile's CF-28 responses, on September 30, 2025, CBP issued a CF-29 Notice of Action for entry [#]8058, stating that payment of AD/CVD duties for CISP and CISPF from China was due on the entry for various reasons.⁷⁴

After initiation of the EAPA investigation, CBP reviewed Long Mile's CF-28 responses for entry number [#]8058. The commercial invoice, packing list, and bill of lading showed that PBCC Engineering was the seller, exporter, and shipper of the merchandise, and that Long Mile's purchase order listed Lino Metal Corp. in Flushing, NY as the vendor.⁷⁵ These documents all showed the purchase order number was USA937B/941-3B; this is the same format used by Lino Metal Corp. for its purchase orders pertaining to shipments of CISP and CISPF from Cambodia.⁷⁶ Long Mile stated the purchase order was "to Lino Metal Corp (PBCC Engineering Co., Ltd)," implying that Lino Metal Corp. and PBCC Engineering are the same company, or at the very least, associated with one another.⁷⁷

The mill test report provided in the CF-28 responses listed PBCC Engineering as the "shipper" and Lino Metal Corp. as the purchaser, and did not include heat numbers or show testing for specific products.⁷⁸ The production records that Long Mile provided consisted merely of container loading records for the finished goods, daily finished goods production output reports, and daily raw material consumption reports, with both sets of finished goods records bearing Phoenix Metals' name.⁷⁹ Long Mile did not explain how the figures on the raw material consumption reports tie to the CISP and CISPF imported into the United States; it merely stated the records were "for all relevant production days," and that "these raw materials are used both to produce pipes and fittings."⁸⁰ Long Mile supplied various documents for the purchases of three different raw materials; one set of documents, which consisted of a commercial invoice, packing list, bill of lading, and customs documents, showed that Phoenix Metal purchased [raw material] from [company], with an address listed in China.⁸¹ Other records also showed that Phoenix Metals purchased the raw materials.⁸² Long Mile reported that Phoenix Metal

⁷¹ See Long Mile CF-28 response for entry number [#]8058 (May 20, 2025) (Long Mile First CF-28 Response).

⁷² See CF-28 issued to Long Mile for entry number [#]8058 (July 9, 2025).

⁷³ See Long Mile CF-28 Response for entry number [#]8058 (September 8, 2025) (Long Mile Second CF-28 Response).

⁷⁴ See CBP CF-29 Notice of Action for entry number [#]8058 (September 30, 2025).

⁷⁵ See Long Mile First CF-28 Response at commercial invoice, packing list, bill of lading, and purchase order.

⁷⁶ *Id.*; see also Allegations at Exhibit 9.

⁷⁷ See Long Mile First CF-28 Response at letter, page 1.

⁸¹ *Id.* at Exhibit 2.

⁸² *Id.* at Exhibits 2 and 4.

produced all the products in this entry, and that Ms. Linghong Li is Phoenix Metal's 100 percent shareholder and its General Manager.⁸³

Long Mile stated that it [information in response to question about whether IOR is related to the seller of the merchandise

] ⁸⁴ Long Mile did not provide any documentation for payment of the merchandise included in the entry in either of the CF-28 responses and did not explain its failure to do so,⁸⁵ but it did state that it had [information in response to question about payment for the entry].⁸⁶

B. Seamist Pomona

On February 3, 2026, CBP issued CF-28s to Seamist Pomona for two entries of covered merchandise, [#]7511 and [#]2586, made during the POI.⁸⁷ These CF-28s requested documentation substantiating the HTSUS classification number; entry package (invoice, packing list, bills of lading, *etc.*); contracts, if any; purchase orders; proof of payment; production information (detailed description of the production process, description and photographs of production machinery, *etc.*); factory profile, including registration information, production capacity, and number of employees; documentation and information related to raw materials; and complete factory production records, including stamped employee timecards, and work orders, as well as raw material, semi-finished, and finished goods inventory movement documentation.⁸⁸

Seamist Pomona did not respond to the CF-28 for entry number [#]7511, which consisted of CISP. For entry number [#]2586, which consisted of CISPF, Seamist Pomona submitted a CF-28 response, although it was incomplete.⁸⁹ Seamist Pomona provided photographs of various pipe fittings, with the name "Lino" visible on some, and two short videos (one showing [product] and the other showing [action]), but no photographs or videos demonstrating other parts of the production process.⁹⁰ Seamist Pomona also provided a mill test report, but the mill test report, which listed Phoenix Metal as the shipper and Seamist Pomona as the purchaser, did not include heat numbers or show testing for specific products.⁹¹ The only other documents that Seamist Pomona submitted were a certificate of incorporation for Phoenix Metal, a production flowchart for CISPF, and one raw material invoice for [raw material] with related payment information referencing

Linghong Li and Phoenix Metal.⁹² Seamist Pomona did not furnish any of the requested documentation related to HTSUS classification, entry documents, purchase order, proof of payment for the entry, or complete factory production records (including employee and inventory movement records).⁹³ As for the single raw material invoice with payment information, Seamist Pomona did not provide any information demonstrating how these documents were tied to the entry at issue, nor did it provide any other information related to raw material purchases.⁹⁴

C. California Plumbing

On March 9, 2026, CBP conducted a cargo exam of entry number [#]8559, which was said to contain CISP.⁹⁵ CBP observed that the merchandise was indeed CISP.⁹⁶ Photographs taken during the cargo exam show that “[marking]” and “[marking]” were marked on the CISP, the latter marking likely a reference to Phoenix Metal.⁹⁷ Documents submitted in DIS for this entry show that Phoenix Metal sold, exported, and shipped the CISP to California Plumbing.⁹⁸

On March 10, 2026, CBP issued a CF-28 to California Plumbing for the entry subject to the cargo exam.⁹⁹ This CF-28 requested the same information as the CF-28s issued to Seamist Pomona.¹⁰⁰ California Plumbing did not respond to CBP’s CF-28 by the deadline.

CBP Data and Other Information Reviewed by CBP

CBP reviewed data in its systems regarding POI entries made by the Importers of CISP and CISPF from Cambodia. These data establish that during the POI, shipments of CISP and CISPF from Cambodia manufactured by PBCC Engineering or Phoenix Metal switched from one importer to another.¹⁰¹ Specifically, CBP data demonstrate that Long Mile entered CISP and CISPF from Cambodia beginning in November 2024 and continued entering CISP and CISPF from Cambodia through May 2025, but had no such entries after that.¹⁰² CBP data also show that Seamist Pomona entered CISP and CISPF from Cambodia from June 2025 through

¹⁰⁰ *Id.*

¹⁰¹ See Post-Receipt Data for Long Mile, CISP; Post-Receipt Data for Long Mile, CISPF; Post-Receipt Data for Seamist Pomona, CISP; Post-Receipt Data for Seamist Pomona, CISPF; and CBP Post-Receipt Data Report for EAPA Case Number 8250 (January 14, 2026) (Post-Receipt Data for California Plumbing, CISP).

¹⁰² See Post-Receipt Data for Long Mile, CISP and Post-Receipt Data for Long Mile, CISPF. As noted previously, the POI for this consolidated investigation begins on December 22, 2024.

September 2025 and had no other such imports before or after that period.¹⁰³ California Plumbing first entered CISP from Cambodia in December 2025, with no such entries prior to that date.¹⁰⁴

CBP also reviewed publicly available information regarding the Importers. Based on corporate registration records in the California Secretary of State's records system, Long Mile terminated its operations on October 31, 2025.¹⁰⁵ In addition, CBP observed that Honghai Wang, who registered Seamist Pomona in Texas in April 2025 at the same address at which he had registered Wells Plumbing in Texas,¹⁰⁶ is Seamist Pomona's sole principal on record and manager.¹⁰⁷ CBP also examined additional information pertaining to California Plumbing's location. The Allegations show that California Plumbing's registered address, 1711 California Ave., Monrovia, CA 91016, also appears on Wells Plumbing's Instagram page, while the address on Wells Plumbing's website for its Monrovia branch, 244 E. Pomona Ave., Monrovia, CA, 91016, is located at the back of the same lot as 1711 California Ave., Monrovia, CA 91016.¹⁰⁸ The Allegations also demonstrate that Honghai Wang is the registered agent for, and a manager of, a real property management company called Wells Pomona LLC with the registered address 1703-1711 S. California Avenue, Monrovia, CA 91016.¹⁰⁹ A Google Maps search for 1711 California Avenue (or 1711 S. California Avenue), Monrovia, CA, shows a building with the name "King Cheese" and address "229 Railroad Avenue" printed on its awning.¹¹⁰ Using Google Street View, the building immediately to its right bears the address "1703 S. California" and has the name "Wells Plumbing and Heating Supplies" marked above the loading dock.¹¹¹

As noted above, the CF-28 response from Long Mile for entry number [#]8058 included a raw material invoice and packing list from [company] to Phoenix Metal.¹¹² The first result of a Google search for "[company]" is the website for Dalian Metal I/E Co., Ltd. (Dalian Metal) (<http://www.dalianmetal.com/>).¹¹³ The home page of this website states "Dalian Metal I/E Co., Ltd is a professional manufacturer and supplier of cast iron pipe and fittings and steel pipe in China" and, notably, contains photographs of CISP that are marked "Cambodia."¹¹⁴ The contact page lists an address in China and the email address lino@dalianmetal.com.¹¹⁵

CBP also reviewed prior EAPA investigations in which it determined there was substantial evidence of evasion by various importers, including Lino and Phoenix Metal, of the AD/CVD

¹¹⁵ *Id.*

orders on CISP and CISPF from China by means of transshipment through Cambodia.¹¹⁶ In the notice of determination as to evasion for EAPA consolidated case 7621, CBP had found that Linghong Li was the owner of Phoenix Metal and Dalian Metal (discussed in the previous paragraph) and that the following companies were also owned by Ms. Li or founded by her employees or family members: Lino, Lino Metal Corp., Dalian Lino FTZ Co. Ltd., Dalian Metal, Dalian Metal FTZ Co., Ltd., DLNL Trading Inc., and Camellia Casting, Inc.¹¹⁷

“Doing Business as” Companies

In May 2022, Honghai Wang, the president of Wells Plumbing, registered Wells Plumbing at 1215 Seamist Drive, Houston, TX 77008.¹¹⁸ In April 2025, Honghai Wang registered Seamist Pomona at 1215 Seamist Drive, Houston, TX 77008.¹¹⁹ Honghai Wang is Seamist Pomona’s sole principal on record and serves as manager.¹²⁰ Wells Plumbing’s website lists the address for “Wells Plumbing Houston” as 1215 Seamist Drive, Houston, TX 77008.¹²¹ CBP finds that since Wells Plumbing and Seamist Pomona were registered by the same individual, share a manager, and are located at the same exact address, they are, at the very least, associated entities, and that Seamist Pomona may be a “doing business as” company for Wells Plumbing.

Linghong Li registered California Plumbing in July 2025 at 1711 California Ave., Monrovia, CA, 91016.¹²² Wells Plumbing lists the nearly identical address, 1711 S. California Ave., Monrovia, CA, 91016, on its Instagram page.¹²³ Wells Plumbing’s website indicates that it has a branch in Monrovia, CA at 244 E. Pomona Ave., Monrovia, CA, 91016, which, according to Google Maps, is on the same lot as 1711 California Ave, *i.e.*, the location of California Plumbing.¹²⁴ Moreover, Wells Plumbing’s president, Honghai Wang, also registered a property management company, Wells Pomona LLC, at 1703-1711 S. California Avenue, Monrovia, CA 91016; a Google Maps search for 1711 California Avenue (or 1711 S. California Avenue), Monrovia, CA, reveals a building with the name “King Cheese” on its awning, with the building immediately to its right having the address “1703 S. California” and the name “Wells Plumbing and Heating Supplies.”¹²⁵ Given that California Plumbing and Wells Plumbing’s Monrovia location both use the same address (1711 California Avenue), are located on the same lot (considering Wells Plumbing’s 244 E. Pomona Avenue address), and California Plumbing was registered at a property owned by “Wells Pomona LLC,” which was registered by Honghai Wang, Wells Plumbing’s president, CBP finds that California Plumbing and Wells Plumbing are associated entities, and that California Plumbing is likely “a doing business as” company for Wells Plumbing.

¹¹⁶ See Allegations at Exhibits 3-6.

¹¹⁷ *Id.* at Exhibit 6, page 8.

¹¹⁸ *Id.* at Exhibit 16.

¹¹⁹ *Id.* at Exhibit 15.

¹²⁰ See Additional Importer Information at Attachment 2.

¹²¹ See Allegations at Exhibit 17.

¹²² *Id.* at Exhibit 19.

¹²³ *Id.* at Exhibit 21.

¹²⁴ *Id.* at Exhibit 17 and 21.

¹²⁵ *Id.* at Exhibit 16 and Additional Importer Information at Attachment 3.

Because CBP finds that Seamist Pomona and California Plumbing are both associated with, and likely “doing business as” companies for, the same entity, Wells Plumbing, CBP is treating these three entities as associated entities in this investigation.¹²⁶

Analysis

Record evidence gives rise to reasonable suspicion that California Plumbing, Long Mile, and Seamist Pomona are evading the *CISP Orders* and *CISPF Orders* by transshipping covered merchandise through Cambodia. In making this determination, CBP is relying on information in the Allegations, data in CBP systems, the Importers’ CF-28 responses (or lack thereof), and other information placed on the record.

As an initial matter, CBP finds that the Importers have engaged in a pattern of continued evasion involving many of the same entities which were subject to past EAPA investigations concerning the transshipment of Chinese-origin CISP and CISPF through Cambodia. In EAPA consolidated cases 7454 and 7455, CBP has already determined there was substantial evidence that U.S. importer Lino entered Chinese-origin CISP and CISPF that had been transshipped through Cambodia.¹²⁷ Lino (*i.e.*, Lino International Inc.) is part of the Lino group of companies, as is Lino Metal Corp., whose name appeared in the context of entries subject to this investigation, as explained in detail below.¹²⁸ While EAPA consolidated cases 7454 and 7455 were still ongoing, DLNL Trading Inc., also part of the Lino group of companies, began importing CISP and CISPF that was also transshipped through Cambodia.¹²⁹ Subsequently, in EAPA consolidated case 7621 and EAPA case 7624, CBP determined there was substantial evidence that another importer, Little Fireflies, began entering Chinese-origin CISP and CISPF that was transshipped through Cambodia; CBP noted that Little Fireflies’ Cambodian source of the transshipped covered merchandise was the same as Lino’s.¹³⁰ Further, in EAPA consolidated case 7621, CBP also determined there was substantial evidence that Phoenix Metal, another company within the Lino group, replaced Little Fireflies as the importer of record for Chinese-origin CISP transshipped through Cambodia.¹³¹ Although Phoenix Metal claimed in EAPA consolidated case 7621 to be the producer of the CISP in Cambodia, CBP found that Phoenix Metal could not substantiate those claims.¹³² As discussed in detail below, the record demonstrates that Phoenix Metal was involved in entries subject to this investigation.

In this EAPA investigation, data from CBP systems demonstrate that Long Mile imported CISP and CISPF from Cambodia during the earlier part of the POI, then imports of such merchandise switched to Seamist Pomona and then to California Plumbing, consistent with the behavior of various entities in the prior EAPA investigations discussed above. Specifically, CBP data

¹²⁶ While California Plumbing has not had any entries of CISPF under its own name as of the date of this notice, by virtue of California Plumbing and Seamist Pomona being associated with one another through their association with Wells Plumbing, CBP considers California Plumbing to have made entries of CISPF during the POI and, accordingly, is subject to this EAPA investigation for any entries of CISPF.

¹³² *Id.*

establish that, Long Mile entered CISP and CISPF from Cambodia from November 2024 through May 2025; Seamist Pomona imported CISP and CISPF from Cambodia from June through September 2025; and California Plumbing entered CISP from Cambodia beginning in December 2025.¹³³ These companies do not have any imports of CISP or CISPF from Cambodia outside of those time frames.¹³⁴ It is also worth noting that each importer was established only shortly before it began entering such merchandise. Long Mile was registered in California in September 2024, shortly before it commenced importing CISP and CISPF from Cambodia.¹³⁵ Seamist Pomona was registered in Texas in April 2025, just two months before it entered CISP and CISPF from Cambodia.¹³⁶ Finally, California Plumbing was registered in California in August 2025, only months prior to entering CISP from Cambodia.¹³⁷ Long Mile dissolved its operations on October 31, 2025, only five months after its last import of CISP and CISPF from Cambodia.¹³⁸ The transition from Long Mile to Seamist Pomona to California Plumbing as importers of CISP and CISPF from Cambodia during the POI, coupled with the timeline when each was registered and Long Mile's subsequent dissolution, suggests that the Importers were established with the intention of evading AD/CVD duties.

Moreover, record evidence demonstrates that the Importers are affiliated with, or their entries involved, entities implicated in the evasion schemes in EAPA consolidated cases 7454, 7455, and 7621 and EAPA case 7624. In EAPA consolidated case 7621, CBP noted that Linghong Li was the owner of Phoenix Metal and Dalian Metal, and that a number of other companies, including Lino, Lino Metal Corp., Dalian Lino FTZ Co. Ltd., Dalian Metal, Dalian Metal FTZ Co., Ltd., DLNL Trading Inc., and Camellia Casting, Inc, were also owned by Ms. Li or founded by her employees or family members.¹³⁹ California Plumbing was registered by Linghong Li, which is evidence that Ms. Li, and the Lino group of companies, is affiliated with California Plumbing.¹⁴⁰ Because CBP is treating Seamist Pomona, California Plumbing, and Wells Plumbing as associated entities, as explained in the "Doing Business as Companies" subsection of this notice, CBP finds that Seamist Pomona (and Wells Plumbing) may also be affiliated with Linghong Li and the Lino group of companies. In addition, the record demonstrates that the Importers entered CISP and CISPF from Phoenix Metal in Cambodia.¹⁴¹ In particular, in its CF-28 responses for entry number [#]8058, Long Mile reported that Phoenix Metal manufactured all the products in the entry at issue, and Phoenix Metal's name appeared on

¹³³ See Post-Receipt Data for Long Mile, CISP; Post-Receipt Data for Long Mile, CISPF; Post-Receipt Data for Seamist Pomona, CISP; Post-Receipt Data for Seamist Pomona, CISPF; and Post-Receipt Data for California Plumbing, CISP. As noted previously, the POI for this consolidated investigation begins on December 22, 2024.

¹⁴⁰ *Id.* at Exhibit 19.

¹⁴¹ See Post-Receipt Data for Long Mile, CISP; Post-Receipt Data for Long Mile, CISPF; Post-Receipt Data for Seamist Pomona, CISP; Post-Receipt Data for Seamist Pomona, CISPF; Post-Receipt Data for California Plumbing, CISP; Long Mile Second CF-28 Response; Seamist Pomona CF-28 Response for Entry [#]2586; California Plumbing Cargo Exam Photographs; and DIS documents for entry number [#]8559.

finished goods records and raw material purchase records.¹⁴² Long Mile also reported that Linghong Li is Phoenix Metal's 100 percent shareholder and its General Manager, establishing that Ms. Li continues to own Phoenix Metals, as CBP found in EAPA consolidated case 7621.¹⁴³ In its CF-28 response for entry number [#]2586, Seamist Pomona provided a mill test report listing Phoenix Metal as the shipper, a raw material invoice and payment documents referencing Phoenix Metal and Linghong Li, and a certificate of incorporation for Phoenix Metals.¹⁴⁴ With respect to California Plumbing, photographs taken during the cargo exam for entry number [#]8559 show that one of the markings on the CISP was "[marking]," which likely refers to Phoenix Metal.¹⁴⁵ Documents submitted in DIS for this same entry by California Plumbing demonstrate that Phoenix Metal sold, exported, and shipped the CISP to California Plumbing.¹⁴⁶

Other information on the record also ties the Importers' entries to companies belonging to the Lino group of companies. Documents in Long Mile's CF-28 responses reference purchase order number "USA937B/941-3B," which is the same format used by Lino Metal Corp. for its purchase order numbers associated with shipments of CISP and CISPF from Cambodia.¹⁴⁷ Long Mile's purchase order listed Lino Metal Corp. as the vendor, and the mill test report listed Lino Metal Corp. as the purchaser.¹⁴⁸ Long Mile described the purchase order as the "Purchase Order to Lino Metal Corp (PBCC Engineering Co., Ltd)," suggesting that Lino Metal Corp. and PBCC Engineering are the same company or somehow associated with one another.¹⁴⁹ One set of raw materials purchase documents in Long Mile's CF-28 responses indicated that [company], with an address listed in China, was the vendor; when CBP conducted a Google search for this company, the first result led to the website for Dalian Metal, which, remarkably, contains photographs of CISP marked "Cambodia" even though the website indicates that Dalian Metal's address is in China.¹⁵⁰ Some of the photographs included in Seamist Pomona's CF-28 response showed pipe fittings with the name "Lino" on them.¹⁵¹

Finally, the Importers failed to demonstrate, through responses to CF-28s, that production of the CISP and CISPF they entered during the POI actually occurred in Cambodia. The Long Mile CF-28 responses that CBP reviewed for entry [#]8058 and Seamist Pomona's CF-28 response for entry number [#]2586 lacked crucial information.¹⁵² The mill test reports included in Long Mile's and Seamist Pomona's CF-28 responses did not include heat numbers or

¹⁵¹ See Seamist Pomona CF-28 Response for Entry [#]2586.

¹⁵² See generally Long Mile First CF-28 Response, Long Mile Second CF-28 Response, and Seamist Pomona CF-28 Response for Entry [#]2586.

show testing for specific products.¹⁵³ The only production records that Long Mile provided in its CF-28 response consisted of two sets of finished goods reports and daily raw material consumption reports, and Long Mile did not explain how the figures on the raw material consumption reports correlated with the CISP and CISPF on the entry.¹⁵⁴ Long Mile also did not provide proof of payment for the entry and did not explain why it could not do so.¹⁵⁵ In its CF-28 response for entry number [#]2586, Seamist Pomona failed to provide much of the information that CBP requested, including documentation related to HTSUS classification, entry documents, purchase order, proof of payment for the entry, or complete factory production records (including employee and inventory movement records).¹⁵⁶ Seamist Pomona also did not explain how the single raw material invoice for one input and accompanying payment documents it provided tied to this entry, nor did it provide any other information related to raw material purchases.¹⁵⁷ The two short videos that Seamist Pomona provided showed [product] and [action]), but it did not provide videos demonstrating any other parts of the production process for CISPF.¹⁵⁸ Seamist Pomona did not submit a response to the CF-28 issued for entry number [#]7511, nor did California Plumbing submit a response by the deadline to the CF-28 issued for entry number [#]8559. Accordingly, due to the Importers' insufficient or complete lack of CF-28 responses, CBP finds that the Importers failed to establish that the production of the CISP and CISPF reflected on the entries at issue on the CF-28s took place in Cambodia.

In summary, based on the Importers' pattern of switching from one importer to the next, the Importers' associations with entities involved in previous EAPA investigations concerning Chinese-origin CISP and CISPF transshipped through Cambodia, and the Importers' failure to demonstrate that their entries of CISP and CISPF from Cambodia were actually manufactured in Cambodia, CBP finds there is reasonable suspicion that the Importers are evading the *CISP Orders* and *CISPF Orders* by transshipping covered merchandise through Cambodia.

Enactment of Interim Measures

Based on the record evidence described above, CBP determines that reasonable suspicion exists that California Plumbing, Long Mile, and Seamist Pomona entered covered merchandise into the United States through evasion by importing CISP and CISPF from China that was transshipped through Cambodia. Therefore, CBP is imposing interim measures pursuant to this investigation.¹⁵⁹ Specifically, in accordance with 19 U.S.C. § 1517(e), CBP shall:

- (1) suspend the liquidation of each unliquidated entry of such covered merchandise that entered on or after January 16, 2026, the date of the initiation of the investigation;

¹⁵³ See Long Mile First CF-28 Response at mill test report and Long Mile Second CF-28 Response at Exhibit 8, and Seamist Pomona CF-28 Response for Entry [#]2586 at mill test report.

¹⁵⁴ See Long Mile Second CF-28 Response at 3 and Exhibit 1.

¹⁵⁸ *Id.* at videos.

¹⁵⁹ See 19 U.S.C. § 1517(e); *see also* 19 C.F.R. § 165.24.

- (2) pursuant to the Commissioner's authority under 19 U.S.C. § 1504(b), extend the period for liquidating each unliquidated entry of such covered merchandise that entered before January 16, 2026, the date of the initiation of the investigation; and
- (3) pursuant to the Commissioner's authority under 19 U.S.C. § 1623, take such additional measures as the Commissioner determines necessary to protect the revenue of the United States, including requiring a single transaction bond or additional security or the posting of a cash deposit with respect to an entry of such covered merchandise.¹⁶⁰

In addition, CBP will require live entry of merchandise, reject any entry summaries that do not comply with live entry requirements, and require refiling of entries that are within the entry summary rejection period.¹⁶¹ CBP may also evaluate the Importers' continuous bonds to determine their sufficiency.¹⁶² Finally, CBP may pursue additional enforcement actions, as provided by law, consistent with 19 U.S.C. § 1517(h).

For future submissions or factual information that you submit to CBP pursuant to this EAPA investigation, please provide both a business confidential version and public version, with public summaries, to CBP *via* the EAPA Portal (a.k.a. the EAPA case management system, or CMS) at <https://eapallegations.cbp.gov>. Documents uploaded to the CMS will constitute service on the parties to this investigation¹⁶³ and all administrative record documents will be available *via* the CMS. Please note that CBP requires that all documents submitted *via* the CMS are made text searchable, especially if those documents are submitted as PDFs.
