Re: Notice of Initiation of Investigation and Interim Measures - EAPA Case 8282

To the Counsel and Representatives of the above-referenced entities:

This letter is to inform you that U.S. Customs and Border Protection (CBP) has commenced a formal investigation under Title IV, Section 421 of the Trade Facilitation and Trade Enforcement Act of 2015, commonly referred to as the Enforce and Protect Act (EAPA), against importer Star EV Corporation (Star EV).¹ CBP is investigating whether Star EV evaded antidumping duty (AD) order A-570-176 and countervailing duty (CVD) order C-570-177 on low speed personal transportation vehicles (LSPTVs), also known as golf carts, from the People's Republic of China (China).² Based on a review of available information, CBP finds that reasonable suspicion exists that Star EV entered covered merchandise into the customs territory of the United States through evasion. Thus, CBP has imposed interim measures on Star EV.³

Period of Investigation (POI)

Pursuant to 19 C.F.R. § 165.2, entries covered by an EAPA investigation are “those entries of allegedly covered merchandise made within one year before the receipt of an allegation....” Entry is defined as an “entry, or withdrawal from warehouse for consumption, of merchandise into the customs territory of the United States.”⁴ CBP acknowledged receipt of the properly filed

¹ See The Coalition's Letter, “Low Speed Personal Transportation Vehicles from the People's Republic of China: Request for an Investigation under the Enforce and Protect Act,” dated March 13, 2026 (the Allegation) at 5. The Allegor demonstrates that it qualifies as an interested party because it is a trade or business association in which a majority of the members manufacture, produce, or wholesale a domestic like product in the United States; thus, pursuant to 19 C.F.R. § 165.1(4), the Allegor meets the definition of an interested party that is permitted to submit an EAPA allegation. See the Allegations at Exhibit 1 at 3.

² See *Certain Low-Speed Personal Transportation Vehicles from the People's Republic of China: Amended Final Antidumping Duty Determination and Antidumping Duty Order; Amended Final Determination of Countervailing Duty Investigation and Countervailing Duty Order*, 90 Fed. Reg. 38759 (Department of Commerce, August 12, 2025) (collectively, the *Orders*).

³ See 19 U.S.C. § 1517(e); see also 19 C.F.R. § 165.24.

⁴ See 19 U.S.C. § 1517 (a)(4); see also 19 C.F.R. § 165.1.

allegation against Star EV on March 17, 2026.⁵ Therefore, the entries covered by this investigation are those entered for consumption, or withdrawn from warehouse for consumption, from March 17, 2025, through the pendency of this investigation.⁶

Initiation

The Trade Remedy Law Enforcement Directorate (TRLED) within CBP's Office of Trade will initiate an investigation if it determines that “{t}he information provided in the allegation ... reasonably suggests that the covered merchandise has been entered for consumption into the customs territory of the United States through evasion....”⁷ Evasion is defined as “entering covered merchandise into the customs territory of the United States by means of any document or electronically transmitted data or information, written or oral statement, or act that is material and false, or any omission that is material, and that results in any cash deposit or other security or any amount of applicable antidumping or countervailing duties being reduced or not being applied with respect to the merchandise.”⁸ Thus, the allegation must reasonably suggest not only that merchandise subject to an AD/CVD order was entered into the United States by the importer, but also that such entry was made by a material false statement or act, or material omission, which resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.

On March 20, 2026, TRLED initiated this investigation against Star EV based on an allegation submitted by the American Personal Transportation Vehicle Manufacturers Coalition (the Alleger) concerning the evasion of AD/CVD duties.⁹ In the Allegation, the Alleger asserted that Star EV evaded the *Orders* LSPTVs from China into the United States by misclassifying goods at the time of entry and by transshipping goods via Vietnam, resulting in no payment of applicable AD/CVD duties.¹⁰

Description of the Alleged Transshipment Scheme

The Alleger argues that the covered merchandise under the *Orders* includes LSPTVs and their subassemblies, particularly rolling chassis, whether finished or unfinished, assembled or unassembled.¹¹ The Alleger indicates that the United States International Trade Commission found in the Commission's final investigation that that “there is no independent market for LSPTV rolling chassis”.¹² The Alleger asserts that the rolling chassis “accounts for a substantial portion of the price of a finished LSPTV, and has no independent purpose or value other than as the base of an LSPTV.”¹³ The Alleger further argues that “any company that imports an LSPTV

¹³ *Id.* at 13.

rolling chassis almost certainly intends to use it in a finished LSPTV.”¹⁴ Additionally, the Alleger contends that unassembled golf cart components imported together with LSPTVs, or chassis, are covered by the *Orders* and that these components include, but are not limited to batteries, bumpers, wheel and tire assemblies, cowlings, fenders, grills, kick plates, steering column and steering wheel assemblies, dash assemblies, seat assemblies, pedal assemblies, brake assemblies, canopy or roof assemblies, temporary rain enclosures, windshields, mirrors, headlights, taillights, lighting systems, and storage.¹⁵ Furthermore, the Alleger argues that individual Chinese-origin LSPTV components entered on a separate bill of lading from any rolling chassis and imported to assemble finished LSPTVs are covered by the *Orders*, such as seat assemblies, steering columns, suspension systems, plastic cowlings, and electric or gas powered motors, unless accompanied by the importer certification required by the Department of Commerce (Commerce).¹⁶

The Alleger asserts that, based on an investigative report from a market researcher, bill of lading data, and other evidence, Star EV has followed a common pattern of evasion for importers attempting to evade the *Orders* by disassembling complete subassemblies into smaller parts and components covered by the scope of the *Orders*, with some importers also utilizing transshipment routes through Vietnam to import entire golf carts.¹⁷ Specifically, evidence documented in the market researcher’s investigative report indicates that parts such as suspension components, batteries, and other LSPTV components were found at Star EV’s facilities in the United States.¹⁸ Furthermore, the Alleger contends that the incentive for evasion is high due to the AD/CVD duty rates, which can be as high as 478.09 percent for AD duties and as high as 691.58 percent for CVD duties.¹⁹

The Alleger argues that importers, including Star EV, began changing importing patterns once the petition for the *Orders* was filed. The Alleger claimed that Star EV started changing its trade patterns after the start of the critical circumstances period in September 2024. According to the Alleger, Star EV has imported a substantial quantity of goods classified under subheading 8703.10, many described as “electric golf carts and spare parts,” and primarily sourced from several Chinese suppliers, including Guangdong Marshall Electric Vehicle Co., Ltd. (Marshall), Edacar EV Co. Ltd. and Eda Tech Co., Ltd., Suzhou Eagle Electric Vehicle Manufacturing Co. Ltd., and Windus International Inc.²⁰ The Alleger claims that since the beginning of 2025, Star EV has shifted from importing complete vehicles from China to importing Chinese LSPTVs in subassemblies and parts, under the subheadings 8716.80, 4011.90, 9506.32, and 9506.39.²¹ For subheadings 8716.80 and 4011.90, the Alleger argues that these subheadings make up the majority of Star EV’s imports to the United States and represent non-mechanically propelled vehicles and rubber tires, respectively. The Alleger indicates that Star EV’s imports

²⁰ *Id.* at 6-9 and Exhibits 2 and 8.

²¹ *Id.* at 18-19 and 21.

misclassified under subheadings 8716.80 and 4011.90 often have shipment descriptions labeled as “golf cart spare parts.”²² The allegor argues that Star EV’s misclassification of imports and inclusion of “NOT SUBJECT MERCHANDISE” in the shipment description suggests that Star EV is not paying AD/CVD duties on its imports.²³ Overall, the Allegor asserts that the shift in classification of Star EV’s imports is a strategy to avoid duties following the initiation of the AD/CVD investigations.²⁴

The Allegor argues that Star EV’s South Carolina facility cannot support the manufacture of LSPTVs and/or subassemblies thereof.²⁵ The Allegor cites to Star EV’s website indicating that Star EV’s South Carolina facility is a “warehouse and assembly facility.”²⁶ The Allegor also provided the investigative report, which stated that Star EV [description of manufacturing].²⁷ To substantiate this claim, the author of the investigative report, [company name] detailed that the Star EV facility does not have the technical capabilities needed to manufacture LSPTV subassemblies on site, citing the classification of the Star EV building as “industrial light” and that Star EV’s published facility photographs show only two dedicated work stations for LSPTV assembly.²⁸ The [company name] also reported that of the publicly listed Star EV employees, only one serves in an engineering role, “suggesting limited technical capability for manufacturing.”²⁹ The Allegor asserts that “there is no indication of manufacturing equipment or infrastructure for manufacturing LSPTVs or LSPTV subassemblies,” and that Star EV is importing “golf cart spare parts” with the intention of assembling finished LSPTVs.³⁰ The Allegor argues that these imports would be subject to the *Orders*.³¹

Additionally, the Allegor claims that [description] communications from Star EV to its [description] indicate that Star EV is not paying AD/CVD duties.³² [description of an event], Star EV advertised that [description of product]” and that Star EV has “[description of product].”³³

The Allegor also argues that reasonably available information suggests that Star EV is likely transshipping golf carts through Vietnam.³⁴ The Allegor provides bill of lading information from [company name] showing Star EV is increasing its imports of golf carts from Vietnam.³⁵ The Allegor contends that in February 2026, Star EV imported 45,000 kilograms of “off road electric

golf cars” from Minland Energy Technology (Vietnam) Co., Ltd. (Minland).³⁶ The Alleger argues that Minland is not a “legitimate LSPTV producer but rather an affiliate of Star EV’s established Chinese supplier, Marshall, that is being used to transship Chinese LSPTVs through Vietnam.”³⁷ The Alleger points to Minland’s previous history as an export partner with Marxon Energy Inc. (Marxon), a sister company of Marshall, and to Minland’s close proximity, less than 12 kilometers, to Marshall’s facility in Dong Nai Province, Vietnam, as evidence of Marshall’s evolving evasion schemes.³⁸ The Alleger asserts that the increase in golf cart imports from Vietnam and the connections to Marshall reasonably suggest that Star EV is likely transshipping Chinese-origin golf carts via Vietnam and not declaring the merchandise as subject to the *Orders*.³⁹

Initiation Assessment

On March 20, 2026, TRLED found that the information submitted by the Alleger reasonably suggested that Star EV entered merchandise covered by the *Orders* into the customs territory of the United States through evasion.⁴⁰ Specifically, the Alleger relied on evidence in the market researcher’s investigative report, bill of lading data, and [description] email communications from Star EV, as well as open-source reporting, which reasonably suggests that LSPTVs were broken down in China into parts and components and shipped to the United States with the intent to assemble them into finished LSPTVs while failing to declare the merchandise as subject to AD/CVD.⁴¹ Additionally, information in the Allegation indicates that Star EV also likely declared Vietnam as the country of origin (COO) for some entries of LSPTVs.⁴²

For the reasons set forth above, CBP initiated an investigation under the authority of 19 U.S.C. § 1517(b)(1) for Star EV’s imports of covered merchandise that are alleged to be entered for consumption into the customs territory of the United States through evasion during the POI.⁴³

Interim Measures

Not later than 90 calendar days after initiating an investigation under EAPA, TRLED will decide based on the record of the investigation if there is reasonable suspicion that merchandise covered by the *Orders* was entered into the United States through evasion.⁴⁴ CBP need only have sufficient evidence to support a reasonable suspicion that the importer alleged to be evading entered merchandise covered by an AD and/or CVD order into the customs territory of the United States by a materially false statement or act, or material omission, that resulted in the reduction or avoidance of applicable AD and/or CVD cash deposits or other security.⁴⁵ If reasonable suspicion exists, CBP will impose interim measures pursuant to 19 U.S.C. § 1517(e) and 19 C.F.R. § 165.24. As explained below, CBP is imposing interim measures

because there is a reasonable suspicion that Star EV entered covered merchandise into the United States through evasion.⁴⁶

Analysis

CBP Research

CBP data systems confirm, as stated in the Allegation, that Star EV reported Chinese manufacturers Marshall, Suzhou Eagle Electric Vehicle Manufacturing Co. Ltd. (Eagle), Edacar EV Co. Ltd. and Eda Tech Co., Ltd. (collectively, Edacar), and Windus International Inc. (Windus)⁴⁷ as sources of their imported golf cart spare parts.⁴⁸ Star EV reported Marshall as the manufacturer or shipper for approximately [#] percent of the value of Star EV's U.S. imports of golf cart parts from China during the POI.⁴⁹

The Record information below indicates that Marshall, Eagle, and Edacar are golf cart manufacturers, and that Windus is an original equipment manufacturer and original design manufacturer (commonly referred to as OEM/ODM), specializing in castings, metal stampings, metal fabrication, and machined parts:⁵⁰

- Marshall's website and its Made-in-China.com profile indicate that Marshall is a golf cart manufacturer; both websites show Marshall selling golf carts in completed form.⁵¹ Marshall's website shows that it sells a limited selection of electrical golf cart parts, such as power inverters, jump starters, batteries, and portable power stations.⁵² However, CBP trade data shows that Star EV is purchasing more than electrical equipment from Marshall, as indicated by bill of lading descriptions and HTS classifications for Star EV's imports.⁵³
- Eagle's website indicates that it sells completed golf carts and not golf cart parts.⁵⁴
- Edacar's website indicates that it sells completed golf carts and not golf cart parts.⁵⁵
- Windus' website advertises its manufacturing capabilities to include metal casting, metal fabricating, metal forging, rubber molding, assembling, and testing.⁵⁶ Star EV reported

⁴⁶ See 19 C.F.R. § 165.24(a).

⁴⁷ Windus Enterprises, Inc.'s Facebook profile page indicates that both Windus Enterprises, Inc. and Windus International Inc. are located at the same manufacturing address; therefore, CBP will treat Windus Enterprises, Inc. and Windus International Inc. as related businesses, collectively, referred to as Windus for this investigation.

⁴⁸ These names were made public in the Allegation and will be treated as public in this memo. See Memo to the File "Trade Data for the Administrative Record," dated April 8, 2025 (Trade Data Memo) at Attachment 1, citing CBP import data from March 17, 2025, to March 17, 2026.

⁴⁹ Star EV also reported [company name] and [company name] as a manufacturer for [#] shipments, or approximately [#] percent of the value of Star EV's U.S. imports of golf cart parts from China; of these shipments, Star EV reported Marshall as the seller for [#] shipments. Therefore, CBP included this [#] percent value in the [#] percent reported for Marshall. See Trade Data Memo.

⁵⁰ See Memo to the File "Chinese Manufacturer Information for the Administrative Record," dated March 25, 2026 (Chinese Manufacturer Information Memo) at Attachments 1-4.

⁵¹ *Id.* at Attachment 1.

⁵² *Id.*

⁵³ See the Allegation at Exhibit 2 and Trade Data Memo.

⁵⁴ See Chinese Manufacturer Information Memo at Attachment 2.

⁵⁵ *Id.* at Attachment 3.

⁵⁶ *Id.* at Attachment 4.

purchasing golf cart parts from Windus using under the HTS heading for 3926, which classifies “other articles of plastics and articles of other materials of headings 3901 to 3914.”⁵⁷ However, Windus does not advertise having plastic manufacturing capability.⁵⁸ Additionally, while Windus’s website does not advertise manufacturing golf cart parts, Windus advertises selling lightweight rolling chassis suitable for electric vehicles.

Record information indicates that Marshall, Eagle, and Edacar are golf cart manufacturers and that these three companies do not sell the golf cart spare parts that Star EV is claiming to import (see Entry Documents section below).⁵⁹ Further record information indicates that Windus is an OEM/ODM specializing in castings, metal stampings, fabricated and machined parts and is selling a lightweight rolling chassis suitable for electric vehicles.⁶⁰ CBP finds record evidence establishes reasonable suspicion that Star EV is importing products from Marshall, Eagle, Edacar, and Windus to assemble into golf carts to evade the Orders.⁶¹

Entry Documents

On [date], Star EV filed entry [#]0215 (Entry 0215),⁶² importing goods from Chinese golf cart supplier Marshall using HTS numbers 8708.99.5300, 8302.30.3060, 8708.94.5000, and 8708.29.5160.⁶³ Star EV labeled the goods as “[description of product]” and “[description of product]” in the cargo description.⁶⁴ Within the entry documentation, Star EV submitted a commercial invoice associated with the shipment; this commercial invoice specifies [#] units of “[description of product],” classified under HTS number 8708.99.5300, which is used for parts and accessories of the motor vehicles of headings 8701 to 8705, made of cast iron.⁶⁵ However, the commercial invoice clearly states that the product being imported is made of steel and not cast iron and therefore, should not be classified as a cast iron product.⁶⁶ The frame of a golf cart makes up a critical element of a rolling chassis which is covered by the scope of the *Orders*. CBP finds that Star EV misclassifying HTS classification of the golf cart frame, based on the material of the golf cart frame, provides reasonable suspicion that Star EV is obscuring the true nature of its imports to potentially evade duties.

For Entry 0215, Star EV also imported [#] sets of the following parts for the [name] golf cart (on the same bill of lading): [

⁵⁷ Star EV specifically uses HTS number [#], which is an “other” category. See Trade Data Memo

⁵⁸ See Chinese Manufacturer Information Memo at Attachment 4.

⁵⁹ *Id.* at Attachments 1-3

⁶⁰ CBP notes that rolling chassis are covered by the scope of the *Orders*. *Id.* at Attachment 4.

⁶¹ *Id.* at Attachments 1-4.

⁶² See Memo to the File “Star EV Corporation Entry 0215 Documentation for the Administrative Record,” dated March 27, 2026 (Star EV Entry 0215 Documentation Memo) at Attachment 1.

⁶³ HTS number 8708.99.5300 is for parts and accessories of the motor vehicles of headings 8701 to 8705, made of cast iron. HTS number 8302.30.3060 is for other mountings, fittings, etc., suitable for motor vehicles made of iron, steel, zinc or aluminum. HTS number 8708.94.5000 is for steering wheels, steering columns and steering boxes for vehicles. HTS number 8708.29.5160 is for parts and accessories of the motor vehicles of headings 8701 to 8705: parts of bumpers.

⁶⁴ See Star EV Entry 0215 Documentation Memo at Attachment 1.

⁶⁵ *Id.*

⁶⁶ *Id.*

description of products

].⁶⁷ Specifically, CBP notes that number of units of “golf cart spare parts” matches the number of chassis frames imported on the same bill of lading.⁶⁸ Additionally, CBP notes that Star EV does not sell [

description of products

] as separate parts on its website.⁶⁹ CBP notes that the scope of the *Orders* defines golf cart parts and rolling chassis imported together as subject to the *Orders*. Combined with the misclassification of the steel chassis frame and Star EV’s golf cart assembling capabilities, it is reasonably suspicious that Star EV is misclassifying its golf cart parts to evade the *Orders* by importing Chinese golf cart chassis and parts to further assemble golf carts in the U.S and not declaring these imports as subject to the *Orders*.

Connection to Vietnam

During the POI, Star EV began changing its trade patterns to start importing fully assembled golf carts from Vietnamese supplier Minland.⁷⁰ Record information indicates that Minland shares a business relationship with Chinese manufacturer Marshall. Specifically, corporate information from CBP data systems shows that Minland’s only reported director is [name], and that [name] owns the vast majority of shares in Marshall.⁷¹ This shared directorship and ownership by [name] indicates that the companies are related. Marshall’s website, Made-in-China.com, also advertises a location in Vietnam.⁷² Moreover, U.S. trademark registration establishes a link between Minland and Marshall.⁷³ U.S. Patent Trademark Office registration shows that “Marshall” and “Minland” are trademarks owned by Marshall, using the same company name, physical address and attorney to register; both trademarks are for “motorized golf carts.”⁷⁴ Additionally, CBP trade data systems indicate that Minland imported [product] from [company] in [countries] during the POI.⁷⁵ For example, on [date], trade data indicates that Minland imported cargo with the description, “[product]” from Marshall; likewise, Minland also imported “[product]” from Marshall on [dates].⁷⁶ Moreover, CBP recently determined that reasonable suspicion exists that Minland was the transshipment hub for different importers

⁶⁷ *Id.*

⁶⁸ *Id.*

⁶⁹ See Memo to the File “Star EV Corporation Information for the Administrative Record,” dated March 26, 2026 (Star EV Information Memo) at Attachment 1.

⁷⁰ See Trade Data Memo to the File.

⁷¹ CBP data systems indicate that Dong Li owns 99 percent of Shenzhen Marsil Energy Technology Co. Ltd., and that Shenzhen Marsil Energy Technology Co. Ltd. owns 89 percent of Marshall. Therefore, Dong Li owns the majority of the shares in Marshall. See Memo to the File “Minland Energy Technology Vietnam Co., Ltd. Corporation Information for the Administrative Record,” dated March 26, 2026 (Minland Corporation Information Memo) at Attachment 1.

⁷² See Chinese Manufacturer Information Memo at Attachment 1.

⁷³ See Minland Corporation Information Memo at Attachment 2.

⁷⁴ *Id.*

⁷⁵ *Id.* at Attachment 3.

⁷⁶ *Id.* at Attachment 3.

during a similar period of investigation.⁷⁷ This determination of reasonable suspicion was based on the importers' failure to provide Minland's documentation to support raw material purchases in a Customs Form-28 response and the importers' failure to identify Minland's Chinese and Vietnamese suppliers for the critical components when manufacturing the golf carts for export.⁷⁸

Summary

Based on the evidence discussed above, CBP finds there is reasonable suspicion that Star EV has participated in three different evasion schemes to not declare imports as subject to the *Orders*: misclassifying imports of golf cart parts from China, failure to declare golf cart parts as subject to the *Orders*, and transshipping Chinese-origin golf carts via Vietnam. Namely, none of the purported Chinese manufacturers' publicly available sales catalogs align with the claimed imports of Star EV. Specifically, there is a clear disparity between the golf cart parts that Marshall sells and Star EV's imports; neither Eagle nor Edacar sell golf carts parts according to their websites; and Star EV's imports do not match Windus' advertised products and manufacturing capabilities. Furthermore, CBP has reviewed entry documents for entry 0215 that indicate Star EV is misclassifying the types of products being entered (*e.g.*, the misclassification of the steel chassis frame) in the United States, and Star EV seems to, at least for entry 0215, enter the exact same number of parts needed to be added to the chassis to assemble golf carts in the United States. Finally, record evidence regarding the corporate and trade relationship between Minland and Marshall, along with the reasonable suspicion finding involving Minland in EAPA consolidated investigation 8247, also establishes a reasonable suspicion that Star EV is evading the *Orders* for certain LSTPV imports by claiming that its imports are COO Vietnam, rather than COO China.

The totality of the evidence on the record of the investigation supports a reasonable suspicion that Star EV entered LSPTVs and their subassemblies covered by the *Orders* into the customs territory of the United States through evasion.

Enactment of Interim Measures

Based on the record evidence described above, CBP has determined that there is reasonable suspicion that Star EV entered covered merchandise into the United States through evasion by importing Chinese LSPTV via misclassification and transshipment through Vietnam while falsely declaring Vietnam as the COO. Therefore, CBP is imposing interim measures pursuant to this investigation.⁷⁹

For interim measures, in accordance with 19 U.S.C. § 1517(e), CBP shall:

- (1) suspend the liquidation of each unliquidated entry of such covered merchandise that entered on or after March 20, 2026, the date of the initiation of the investigation;

⁷⁷ See Notice of Initiation of Investigation and Interim Measures - EAPA Cons. Case 8247, dated April 6, 2026.

⁷⁸ CBP notes that Marxon is an importer under investigation in EAPA Cons. Case 8247. *Id.*

⁷⁹ See 19 U.S.C. § 1517(e); *see also* 19 C.F.R. § 165.24.

- (2) pursuant to the Commissioner's authority under section 1504(b) of this title, extend the period for liquidating each unliquidated entry of such covered merchandise that entered before the date of the initiation of the investigation; and
- (3) pursuant to the Commissioner's authority under 19 U.S.C. § 1623, take such additional measures as the Commissioner determines necessary to protect the revenue of the United States, including requiring a single transaction bond or additional security or the posting of a cash deposit with respect to such covered merchandise.⁸⁰

In addition, for future entries, CBP will require live entry and reject any non-compliant entry summaries, as well as require the refiling of entries that are within the entry summary rejection period.⁸¹ CBP may also evaluate Star EV's continuous bonds to determine sufficiency.⁸² Finally, CBP may pursue additional enforcement actions, as provided by law, consistent with 19 U.S.C. § 1517(h).

For future submissions or factual information that you submit to CBP pursuant to this EAPA investigation, please provide a business confidential version and public version, with public summaries, to CBP *via* the EAPA Portal (aka the EAPA case management system (CMS)): <https://eapallegations.cbp.gov>.⁸³ Documents uploaded to the CMS will constitute service on the parties to this investigation,⁸⁴ and all administrative record documents will be available *via* the CMS. Please note that CBP requires that all documents submitted *via* the CMS are made text searchable, especially if those documents are submitted as PDFs.

Should you have any questions regarding this investigation, you may contact us at eapallegations@cbp.dhs.gov, Michele.B.Koch@cbp.dhs.gov, and Yagmur.Soybakisli@cbp.dhs.gov with "EAPA Case 8282" in the subject line of your email. Additional information on this investigation, including the applicable statute and regulations, may be found on CBP's website at: <https://www.cbp.gov/trade/eapa>.

Sincerely,

Lee M. Baxley
