

CUSTOMS AND BORDER PROTECTION
ENHANCED PENALTY ASSESSMENT PROGRAM
REFERRAL PACKAGE

Case ID: CBP-2026-9000

Shipment ID: SHP-000731

Date Prepared: May 25, 2026

RISK CLASSIFICATION: ■■ EXTREME

RISK SCORE: 97/100

RECOMMENDATION: HOLD FOR EXAMINATION

EXECUTIVE SUMMARY

Case Overview

Shipper: Canadian Aluminum Inc.
Consignee: Gulf Coast Industrial
Commodity: Semiconductor Devices
HS Code: 8541.40
Route: CA → US
Declared Value: \$8,177.41

Summary Findings:

This shipment presents an extreme-risk profile driven by anomaly detection signals and entity risk indicators.

Data Sources: ISF-Filing, AIS-Archive, Altana-Atlas, Senzing-Trade-Graph

OFFICER NARRATIVE (EDITABLE)

Based on preliminary review of shipment data, the following concerns have been identified: automated risk scoring systems have flagged anomalies in ISF Element 9 data, AIS vessel routing patterns, and entity background verification. Officer review and possible physical examination is recommended before clearance.

Data Source: Officer Manual Review + Automated Risk Scoring Engine

TABLE 3-1: SHIPMENT IDENTIFICATION

Shipper Name	Canadian Aluminum Inc.
Shipper Country	CA
Consignee Name	Gulf Coast Industrial
Consignee Country	US
Commodity	Semiconductor Devices
HS Code	8541.40
Quantity	1 shipment
Declared Value	\$8,177.41
Weight (kg)	11,624

Data Source: ISF-Filing (CBP Port Authority Records)

TABLE 3-2: LINE ITEMS DETAIL

HS Code	Description	Quantity	Unit	Declared Value
8541.40	Semiconductor Devices	1	shipment	\$8,177.41

Data Source: Bill of Lading + ISF Manifest

TABLE 3-3: AIS ROUTING HISTORY

Vessel Name	MV Seamless Journey
IMO Number	9645123
Port of Lading	CA
Port of Unlading	US
Dwell Days	5.2 days (baseline: 2.5 days)
Dwell Anomaly	HIGH
AIS Gaps	2
Transit Days	14

Data Source: AIS-Archive (MarineTraffic + CBP Port Authority)

TABLE 3-4: PARTIES AND ROLES

Entity Name	Role	Country	Risk Notes
Canadian Aluminum Inc.	SHIPPER	CA	None identified
Gulf Coast Industrial	CONSIGNEE	US	New importer

Data Source: ISF-Filing + Senzing Entity Database

TABLE 3-5: ENTITY OWNERSHIP CHAIN

Tier 1

Entity Name: Northamericana Holdings Ltd.

Country: Canada

Ownership %: 100%

Match Confidence: 89%

Risk Signal: None

Data Source: Sensing-Trade-Graph + Company Registry Lookups

TABLE 3-6: RISK SCORING BREAKDOWN (ML MODEL)

Component Scores Summary

Component	Score	Weight	Result
-----------	-------	--------	--------

Final Score Calculation

Subtotal (Component Sum): 0.0

FINAL RISK SCORE: 97/100

Confidence Interval: Unknown

Data Source: ISF-Filing, AIS-Archive, Altana-Atlas, Senzing-Trade-Graph, CBP ML-Risk-Scorer-v2.1

TABLE 3-7: WHAT-IF SCENARIOS (SENSITIVITY ANALYSIS)

Scenario 1: Vietnam Origin Alternative

Assumption: FALSE

Current Score: 97 → 102/100 → Scenario Score: 0/100

Impact: 0 points

Recommendation: ESCALATE

Scenario 2: Transshipment via Hong Kong

Assumption: FALSE

Current Score: 97 → 103/100 → Scenario Score: 0/100

Impact: 0 points

Recommendation: DENY ENTRY

Data Source: Risk-Scoring-What-If-Engine v1.2

DOCUMENT EVIDENCE CHECKLIST

Document	Required	Status	Officer Notes
Bill of Lading	Yes	RECEIVED	Standard format
Commercial Invoice	Yes	RECEIVED	Matches ISF
Certificate of Origin	Yes	MISSING	REQUEST
Manufacturer Certificate	Yes	MISSING	REQUEST

Data Source: CBP Document Portal + Shipper Submission

FORMAL DETERMINATION

Determination: This shipment is subject to **HOLD FOR EXAMINATION**.

Rationale: Risk score of 97/100 is in the EXTREME category requiring officer review.

Submitted: May 25, 2026 at 16:00 UTC

Officer Signature: _____ Date: _____

Supervisor Review: _____ Date: _____

APPENDIX: DATA SOURCES & METHODOLOGY

Data Sources Used in This Assessment:

- ISF-Filing: Importer Security Filing database (CBP)
- AIS-Archive: Automatic Identification System vessel tracking (MarineTraffic)
- Altana-Atlas: Sanctions & supply chain verification (Altana platform)
- Senzing-Trade-Graph: Entity relationship mapping (Senzing)
- CBP ML-Risk-Scorer-v2.1: Machine learning risk classification engine

Methodology:

This referral package was prepared using CBP's Enhanced Penalty Assessment (EAPA) framework, which combines automated risk scoring (H1, H2, H3 factors), anomaly detection algorithms, intelligence integration, and officer judgment. Each section includes explicit data source attribution for auditability.
